

- 1 What is claimed is:
- 2 1. An activity wipe dispenser for dispensing wipes, the dispenser comprising:
- 3 a container for containing a plurality of wipes, the container having a closed
- 4 bottom, sides and an open top;
- 5 a lid for closing the open top of the container; and
- 6 a disposal chamber for receiving used wipes.
- 7 2. An activity wipe dispenser according to Claim 1, further comprising attachment
- 8 means for attaching the container to disparate articles.
- 9 3. An activity wipe dispenser according to Claim 1, wherein the container comprises a
- 10 hollow cylinder.
- 11 4. An activity wipe dispenser according to Claim 3, wherein the cylinder is semi-rigid
- 12 and manufactured from plastic materials
- 13 5. An activity wipe dispenser according to Claim 4, wherein the plastic materials include
- 14 at least one of polyethylene and polypropylene.
- 15 6. An activity wipe dispenser according to Claim 1, wherein the wipes comprise a
- 16 continuous roll of sheet material having perforations which separate individual wipes.
- 17 7. An activity wipe dispenser according to Claim 1, wherein the container is a hollow
- 18 cylinder and the disposal chamber comprises a hollow cylinder hinged to the closed

1 bottom of the container and having latching means for latching an unhinged side of the
2 cylinder at the closed bottom of the container.

3 8. An activity wipe dispenser according to Claim 7, wherein the hollow cylinder of the
4 disposal chamber has flexible and resilient, spaced ribs that span a width of the
5 cylinder, the flexible and resilient ribs deflecting to receive and hold used wipes in the
6 disposal chamber.

7 9. An activity wipe dispenser according to Claim 1, wherein the disposal chamber
8 comprises a bag attached to the container.

9 10. An activity wipe dispenser according to Claim 1, wherein the container is a cylinder
10 and the disposal chamber is formed by a complementary telescoping hollow cylinder
11 which slides over the sides of the container at the closed bottom of the container to form
12 an expandable disposal chamber space, the telescoping cylinder having a disposal port
13 through which used wipes are placed into the disposal chamber space.

14 11. A multi-pack arrangement of activity wipe dispensers wherein each activity wipe
15 dispenser contains wipes with a different and complementary active component
16 particularly useful in connection with different aspects of a specific activity, each activity
17 wipe dispenser having a disposal chamber for receiving used wipes.

18 12. A multi-pack arrangement according to Claim 11, wherein each activity wipe
19 dispenser further comprises:

20 a container for containing a plurality of wipes, the container having a closed
21 bottom, sides and an open top;

1 a lid for closing the open top of the container; and

2 attachment means for attaching the container to disparate articles.

3 13. A multi-pack arrangement according to Claim 12, wherein the container comprises
4 a hollow cylinder.

5 14. A multi-pack arrangement according to Claim 12, wherein the wipes comprise a
6 continuous roll of sheet material having perforations which separate individual wipes.

7 15. A multi-pack arrangement according to Claim 12, wherein the container is a hollow
8 cylinder and the disposal chamber comprises a hollow cylinder hinged to the closed
9 bottom of the container and having latching means for latching an unhinged side of the
10 cylinder at the closed bottom of the container.

11 16. A multi-pack arrangement according to Claim 15, wherein the hollow cylinder of the
12 disposal chamber has flexible and resilient, spaced ribs that span a width of the
13 cylinder, the flexible and resilient ribs deflecting to receive and hold used wipes in the
14 disposal chamber.

15 17. A multi-pack arrangement according to Claim 12, wherein the disposal chamber
16 comprises a bag attached to the container.

17 18. A multi-pack arrangement according to Claim 12, wherein the container is a
18 cylinder and the disposal chamber is formed by a complementary telescoping hollow
19 cylinder which slides over the sides of the container at the closed bottom of the
20 container to form an expandable disposal chamber space, the telescoping cylinder

1 having a disposal port through which used wipes are placed into the disposal chamber
2 space.

3 19. A multi-pack arrangement according to Claim 11, wherein the specific activity
4 comprises one of: boating, camping, sporting events, hunting, tennis, golf, auto care,
5 home care, backpacking, cycling, skiing, child care, patient care, custodial work
6 activities and fishing.

7
8 20. A multi-pack arrangement according to Claim 19, wherein the active ingredients
9 comprise two or more of the following: suntan lotion, sunscreen, insect repellent,
10 deodorants, surface cleaning solutions, vinyl treatment solutions for extending the life of
11 a vinyl surface, glass cleaning solutions, scented solutions, gun oil, shaving lotion,
12 lubricants, paste wax, polish, furniture oil, skin lotion, anti-bacterial soap, antibiotics,
13 beauty aids, fungicides, and antiperspirants.
